## EXPERIENCE

**Co-Founder** May. 2026 - Present
Elevance | Jakarta, Indonesia

- Co-founded a software development company helping businesses digitalize their operations through websites, internal systems, and custom software solutions.
- Work across both technical and business functions, including software development, solution design, client communication, marketing, and business development.
- Work directly with clients to understand existing business processes, identify digitalization opportunities, and translate requirements into practical software solutions.
- Design and develop custom digital products based on real business requirements rather than standardized, one-size-fits-all solutions.
- Manage projects across the full development lifecycle, including planning, frontend and backend development, deployment, and ongoing improvements.
- Contribute to the company's positioning, marketing strategy, service offerings, and overall direction alongside my co-founder.

**Technical Founder & CTO** Oct. 2024 - Present
Vitademy | Jakarta, Indonesia

- Lead the technical direction and development of Vitademy, an education technology platform focused on personalized learning experiences.
- Defined the product's technical strategy and architecture with a focus on scalability, maintainability, performance, and user experience.
- Designed and developed the full-stack platform using Next.js, TypeScript, Tailwind CSS, Prisma ORM, and PostgreSQL.
- Designed scalable application and database structures supporting educational content across multiple subjects, grades, levels, and creators.
- Built responsive and interactive user experiences using reusable components, structured user flows, and dynamic content.
- Implemented authentication, authorization, protected routes, and administrative access using Clerk.
- Managed deployment, database infrastructure, and development workflows using Vercel and Prisma.
- Collaborate with content creators, designers, and stakeholders to transform educational concepts into product features.
- Mentor junior developers, interns, and volunteers through onboarding, code reviews, technical guidance, and engineering best practices.

**Full-Stack Engineer** Feb. 2023 - Present
PT Mayora Indah Tbk. | Jakarta, Indonesia

- Lead the development of internal enterprise applications supporting overseas factory transactions and local purchasing operations.
- Lead and mentor a team of junior developers through technical direction, code reviews, task planning, and development best practices.
- Design and develop in-house applications that digitalize operational workflows and improve how internal teams manage business processes.
- Work directly with business stakeholders to gather requirements and translate operational needs into practical technical

solutions.
- Contribute across the full software development lifecycle, including system design, development, testing, deployment, and maintenance.
- Design and maintain database structures, views, queries, and supporting data processes for enterprise applications.
